

CODE OF EHTICS FOR RESEARCH

Objectives:

The Code of Ethics for Research at the Model Institute of Engineering & Technology (MIET) is to set forth the institutional vision for quality research while adhering to the highest standards of ethics. The Code of Ethics for Research incorporate the basic principles which shall serve as the foundations for the attainment of the research objectives of the institution. There are three objectives for articulating a separate code of ethics for research at MIET:

1. To conduct research which is relevant, encompasses original ideas, innovation and creativity while building on and giving credit to research conducted by external experts in the field.
2. To ensure that research is conducted in a manner that serves the interests of individuals, groups, the region and the society as a whole.
3. To conduct research activities in an ethically sound manner, considering issues such as the management of risk, protection of confidentiality and based on informed consent.

Honesty and Integrity

Be honest in reporting scientific data, results, methods, procedures and publication status. Avoid fabrication, copying, falsification and misrepresentation of data. Maintain accuracy and abide by the rules and regulations of the institution and globally accepted research norms. Be consistent in complying with publishing agreements and honor all licensing terms and conditions.

Ethics

- Do not be negligent in correcting errors. Compare the work with that of the peers with careful and critical analysis. Maintain perfect record of the data collected, research design with proper documentation.
- Share data, results, ideas, tools and resources with the fellow researchers. Accept criticism and novel ideas in professionalism and be competent in improving expertise.

Model Institute of Engineering & Technology (Autonomous)
(Permanently Affiliated to University of Jammu, Accredited by NAAC with “A” Grade)

- Have respect for Intellectual Property and take consent of the owner prior to the use of any data, methodology or results.
- Treat human subjects, if any, with care and concern safeguarding the dignity and privacy and maintain confidentiality of the data. Be compassionate in dealing with the animals while using them for research.
- Strictly avoid plagiarism including self-plagiarism. Use plagiarism detector tools before submission of papers, projects, thesis to any external or internal forum and ensure that they meet similarity norms specified.

The Ethics Mantra – I Am Responsible

- for contributing to the shared knowledge through research in my domain and areas of interest in an ethical manner.
- for encouraging ethical behavior by my juniors, research scholars, students and colleagues.
- for upholding and enhancing my academic and research reputation along with that of my department, institution, state and the nation.
